

October, 2023. Groningen, The Netherlands

ABOUT CoopIS 2023

This 29th edition of **CoopIS**, Cooperative Information Systems, attempts to span a relevant range of the advanced research and cutting-edge development and application, happening in the general area of ubiquitous distributed computing. **CoopIS 2023**, invites fundamental contributions on principles and applications of distributed and collaborative computing in workflows of networked organizations, enterprises, governments of just communities.

Topic 1: Data, Information, and Knowledge Engineering
Topic 2: Machine-Learning and Knowledge Discovery
Topic 3: Process Analytics and Technology
Topic 4: Semantic Interoperability and Open Standards
Topic 5: Security and Privacy
Topic 6: Internet of Things and Digital Twins
Topic 7: Architecture and Management of ISs
Topic 8: Human Aspects and Social Interaction in ISs
Topic 9: Services and Cloud in Information Systems
Topic 10: Knowledge Graphs and Inductive Learning over Knowledge Graphs
Topic 11: Applications of Information Systems in a Digital World

In recent years, several innovative technologies have emerged: Cloud Computing, Service Oriented Computing, the Internet of Things, Linked Open Data, Semantic Systems, Collective Awareness Platforms, Block Chain, Processes as a Service, etc, that enable the next generation of CISs. Research and industry developments are needed towards (a) the applicability and use of the innovative technologies, (b) approaches to develop CISs in particular catering towards the multitude of stakeholders involved in the development of cyber-social-physical systems, and (c) associated modelling techniques to express and analyse the different aspects of these systems in coherence.

GENERAL CHAIRS

Hervé Panetto, University of Lorraine, Nancy, France
Walid Gaaloul, IP Paris – Télécom SudParis, France

PROGRAM COMMITTEE CHAIRS

Maria-Esther Vidal, University of Hannover, Germany
Boudewijn van Dongen, Eindhoven University of Technology, The Netherlands

CONFERENCE SPONSORING OFFERS (Prizes excl. 20% VAT)

SILVER PACKAGE – €1.500

- **Prominent logo placement on the Website**
- **Logo placement in the printed conference program**
- **Display of company logo during plenary speeches**
- **Your leaflet in the attendees box**
- **Mentioning of the sponsors in all social media activities**
- **Two registrations to non-author persons of your choice or one registration for one author at the EDOC+CoopIS forum**

GOLD PACKAGE – €2.500

- **SILVER Package +**
- **Your posters on display at the entrance of the conference location**
- **We cover 2 nights accommodation, you cover your travel costs**

PLATINIUM PACKAGE – €4.500

- **GOLD Sponsor +**
- **Your logo on badges**
- **Promo booth at conference facility**
- **2 extra registrations**

ABOUT EDOC 2023

EDOC 2023 is the 27th conference in the EDOC series that provides a key forum for researchers and practitioners in the field of Enterprise Computing. EDOC addresses the full range of models, methodologies, and engineering technologies contributing to building and evolving intra- and inter-enterprise software systems. From 2022 on, EDOC will be spelled out "Enterprise Design, Operations and Computing" to reflect the broad range of aspects of interest to the conference. **EDOC 2023** calls for contributions with a special emphasis on the theme of designing and operating "Flexible Enterprises". This year's theme reflects an ever-changing world under the influence of disruptive events, trends, and technologies, as well as the increasing role of artificial intelligence.

Topic 1: Enterprise and Systems Architecture
Topic 2: Service-Oriented IT- and Enterprise Architectures
Topic 3: Software Architecture & Engineering
Topic 4: Model Based Enterprise Engineering
Topic 5: Model-driven architectures and software development
Topic 6: Enterprise Security
Topic 7: Business Process and Business rules
Topic 8: Semantics and Information Management

In this context, new concepts and approaches are required: (a) to address pressing challenges in domains like healthcare, advanced manufacturing, finance, environmental management and sustainable agriculture, supply chain management and others, while ensuring compliance with ethical and legal principles, as well as long-term interoperability and resilience of enterprise systems; and (b) to leverage technologies such as digital twins, machine learning, IoT, big data analytics, distributed ledgers/blockchain in trusted enterprise practices.

GENERAL CHAIR

Dimka Karastoyanova, University of Groningen, The Netherlands

PROGRAM COMMITTEE CHAIRS

Henderik A. (Erik) Proper, TU Vienna - Austria
Luise Pufahl, TU Berlin - Germany
